⭐ **Hardworking and Punctual**
Hard working individual who is punctual.

⚡ **Team Player**
Good team player.

💡 **Adaptability**
Easily adapts to any situation.

SKILLS

| API | CSS | HTML | java script | Python | UI&UX | Rest API | SQL | bubble.io | React |

PROJECTS

Parking Management system

📅 2024   📍 Coimbatore, India

Designed and developed a comprehensive **Parking Management System** using **Bubble.io** as the frontend platform and **MySQL** as the backend database. The application efficiently manages parking spaces, vehicle entries/exits, and billing operations for a seamless user experience.

- **Frontend**: Bubble.io (drag-and-drop UI, custom workflows, and responsive design).
- **Backend**: MySQL (data modeling, SQL queries for CRUD operations, and API connections).
- **API Integration**: Connected external services for notifications and payment gateways.

Worklog Application

📅 2024   📍 Coimbatore, India

Developed a **Worklog Application** using **Bubble.io** to help teams and individuals track tasks, log work hours, and monitor project progress. The app provides intuitive interfaces for time tracking and reporting, ensuring transparency and productivity in workplace management.

- **Task Management**: Create, assign, and manage tasks with due dates and priorities,
- **Time Tracking**: Real-time tracking of work hours with manual and automated entry options.
- **Dashboard**: Interactive dashboards displaying team performance, project timelines, and work distribution.
- **Reports and Analytics**: Exportable reports summarizing logged hours, task completion rates, and user activity.
